

# Trip Elix

Entertaining, sometimes provocative, always interesting and interactive, Trip Elix believes in security and privacy.

## Selling Your Children

Parents of children ages 5-20

Whether you like it or not, social media is part of the fabric of our lives. Universities and major corporations will use social platforms like Instagram, Facebook, Twitter, and others to research your child. What they don't expect is that you understand this, and can plan ahead of time. Think of them more like a sales portfolio

## The Kids Are Not Alright

Parents of children ages 5-17

The same companies that bring us junk mail, harassing telephone calls and junk mail are now endangering our children. There are things that every parent should know about the internet.

Trip Elix is an author and security consultant. Over the last 30 years, he has worked privately as a consultant, investigator, forensic technician and a skip tracer. He is the author of four books and gives talks on security and privacy.

His interest in the hacking community started in his youth and he continues to still be involved, going to confernces and on the deep web and its infamous dark web.
